Extended Outlook 10,550FT

Highlights	Thu 05/02	Fri 05/03	Sat 05/04	Sun 05/05
Minimum Temp:	22	20	22	28
Maximum Temp:	40	45	49	55
Precip. Chance:	20%	60%	0%	20%
Precip. Type:	s-shwrs	s/t strms	None	r/s shwrs late
Rain Amount:	Trace	0.10"	0.00	Trace
Snow Amount:	Trace	1"	none	Trace
Snow Level (feet):	6,800	8,500		10,300

Discussion on storm event	<p>The last forecast of the season, and it's been an interesting 2023-24, but a good one! The system overnight and early this morning is bringing some snow showers, but should exit fairly rapidly. We'll see a couple of systems move across the area bringing a cooler air mass with a chance of snow showers through Friday. I believe the "wet" spring will continue through at least the first half of May. If you need any forecasts through the summer, let me know, otherwise, we'll get it started back up October 1st! I'll be sending a summer outlook within the next couple of weeks, as we transition out of El Nino and into La Nina.</p>
